Epperson Springs!

THOSE valuable and highly Medicinal Springs are to-cated in Macon county, Tennessee, on the waters of Trammel Creek, four miles from the terrspike leading from Gallatin, Summer county, Tenn., to Scottsville and Glasgow, Ky, and of easy access from all directions. The proprietors are now prepared to accommodate as unary as probably may favor them with a call. For chronic affections for the Stomach and Bowels, Liver and Spleen, kidneys and Blasder also, of the Skie, Scrofala, Dropey, an many of those allments of which females are the silcut but severe sufferers, no remed en have been found so salutary, and none superior to a few weeks signaria at and the use of these waters. In cases of stone in the Bladder they have, in many instances, acted as a sovereign balm, and in all have afforded relief. There are three varieties of Sulphur Wester, and one strongly imprepated with iron. A correct analysis of all of which will be made upon the premises, as promised by Prot. Safford, State Geologist, some time during this year. Dr. D Bow, one of the Proprietors, will be constantly at the Spring, unless processionally away, who will take pleasure in giving since the day time, except for Medicine or for Surgica carge in the day time, except for Medicine or for Surgica operations. Their charges will be as follows, viz:

YOUNG AMERICA.

A GENTS wanted in every county in this and adjoining States to sell the above new and improved CORN AND COR MILL. To all such, a rare choice to make money will be offered. Exclusive State and County privileges will be disposed of on unusually far terms, by application to the Proprietor. FARMERS AND STOCK RAISERS,

I offer you a Gora and Cob Mill unadrpassed in the Union, and which cannot be superceded by past or future inventions. It is the very Mill which every Farmer and stock Raiser should have; it will crush from 8 to 10 bush-els Corn and Cob per hour, with one horse; is easily fitted up and managed; weighs 240 lba, and as all contact of the granding surfaces is prevented, will last any farmer an or-dinary lifetime. I speak thus of its durability because the same principle has been fairly tested in the old Bark Mill, when it is the

same principle has been fatrly tested in the old Bark Mill, Who is it that wants

for one month, and if it don't give complete satisfaction, to return it? If there he say man thus disposed, let him now speak. Satisfaction is warranted in every case, or the money will be refunded. This Crusher can be attached to horse, water or steam power, which renders it the most convenient Mill south of Mason's and Dixon's line. All the Crusher was in the south require hor much power. other Crashers now in the south require too much power,

THE LAWS OF NATURE a Corn and Cob Mill which admits of a lateral or wabbling ion, will, necessarily, soon wear out; all other Crushers are amenable to this grand objection, and the Proprietors dare not dispute it. In the construction of "Young AMERICA," I have gained power, and I defy contradiction; I have tessened friction, and I challenge one word to the centrary, I bare prevented a wabbling lateral motion, and all are compelled to acknowledge it; therefore, I assert that it is far superior to any other Mill. I am now selling this Ten nessee invention at the small sum of

FIFTY DOLLARS. And any one wanting a "good thing," is extrastly requested to examine the true merits and principles of this Mill, and order from the Proprietor or Agents. A liberal discount made to dealers.

are destinute.

We have remarked that the great and heretofore insurmountable of jection, urged with so much force against estima mills, was their palpable deficiency in durability. To remove this objection was a desideratum long sought lor, and which has been at length attained in the "Excelsion Mill" only, the granding surface of which consists in moveable rings, made in bard and superior metal, and which, when worn out, can be replaced in five minutes by new rings, at a cost of \$3, which makes the mill as good as new, there leads no other part liable to wear out. Two as new, there being no other part liable to wear out. Two setts of grinding rings accomplay each mill, making it equal to two mills. This peculiarity, possessed by no o her mill, should not be overlooked by purchasers, as it insures derability, a consideration of all others the most mportant.

Another interesting feature in this mill, and one which we think will secure for it a just consideration of merit, is in its being provided with a meal conductor, by means of which the meal is discharged into a half bushel, instead of being southered around the mill, as is ordinarily the This mill having been fairly tested with other mills at

the late fair of the Maryland Agricultural Society, at the Ohio State Fair, and elsewhere, at all of which it established its superiority, we do not hesitate emphatically to pronounce it pre-eminently superior to any and all other corn crushers of the day, independent of its moveable grinding rings, which feature of itself makes the distinction be-tween the "hacelsior" and all other corn-crushers so broad as lorender a comperison superfloors; and, as an evidence of our eincerity, we hereby announce that we will give a silver cup to any Corn Crusher that can be produced, of the same size and same length of lever, that will grind finer and faster than the Excelsior, at some time and place to be agreed open.
Capacity of granding corn and cobs with two horses

from 10 to 20, and with one borse, from 8 to 10 bushels per

Cost of Running the Excelsior Mill for Ten hears, at of other Mil It has been proven by experience, and contrary to general expectation, that cast iron Mills for grinding Corn, etc., to do the work properly, will not last more than two

years In view of this last, the inventor of the Excelsion alill has labored to produce a machine that will be more consmical, and at the same time more effectual. The fol lowing estimate will show the cost of grinding with each of the Milis now in use for ten years: Cost of Excelsion Mill. \$50, including an extra set of Grinding Plates, which makes it good for four years. Cost of repairs for six years, \$9, making forten years, \$59.
Cost of common Mills, without any extras, says \$44.—
Cost of running the same for ten years, supplies that he
Mill will last as long as the Excelsion Mill without repairs,
say to be renewed every two years, which in this case must be done at the expense of a new machine each tip \$174, making for the ten years a cost of \$220. This same nie will apply to any and all of the Mills now in use which ooms in competition with the Excelsior Mill, Farmers and others in want of mills for grinding Corn and Cob, etc., will see by the above estimate that the Ex-celsion Mill can be used for the purpose required at less than one third the expense of any other Mill now in use.

This Mill may be put up in a few m nutes by any ordi-tary farm hand, printed directions for which accompany undersigned having purchased the right to the

above Mili in Middle Tennesser, take pleasure in introduc-ing it to the public, believing it to be all that is claimed for it, and well worthy the attention of every Farmer,

STOCKTON'S Patent Straw Cutter. THE multiplicity of Straw Cutters alrealy before the public, a large proportion of which having failed successfully to stand the test of thorough trial, and having failed far short of the representations of the venders, as well as the expectations of the purchasers a general distrust has been created in the public mind for all machines of this description. Hence it becomes a consideration of the utmost in partance before the general introduction of a machine, come range which there is so much doubt, and connected with which there have been suljected to the most thorough and critical test, and its claim to merit clearly established beyond a doubt. This machine has now been established beyond a doubt. This machine has now been in existence upwards of twelve months, during which lime it has been sobmitted to the severest tests, and has undergone modifications and alterations, with a view of bringing it as near perfection as possible. It is now complete, and presented to the public in the full confidence that it will meet the wants of the farming community, and sustain the high reputation it is a decay obtained and the public in the severe community. high reputation it has already obtained, and the opinions formed of it by all who have used it.

formed of it by all who have used it.

We claim for it—

1st. Great strength and durability.

2d. An ontire freedom from complication, being so simple as to be easily operated by a boy twolvo or fateen years of age, we shout the sligatest fear of derangament.

2d. Superiority and excellence of execution, cutting with great ease, rapidity and exactness.

4th Great economy in price, being effored at the low rate of Eight Deilars.

Other anywarter a might be mentioned but workforces. Other advantages might be mentioned, but would occu-

py too much space.
It possesses one peculiarity, however, so remarkable and important that we cannot to bear making mention of it. We allude to its Everlasting Spring, designed to keep the knife always in its reper place and secure uniformity of execution, at the same time yielding to any hard and foreign substance, the appearance of which in most machines would be limble to produce serious injury.

THE ONLY INFALLIBLE KRMEDY! Hurley's Sarsaparilla OF all the remedies that have been discovered during the present age for the "thousand ills that fesh is helr to, none equal this wonderfal preparation. Only three years have elapsed since the discoverer (who speat a decade is studying, experimentalizing and perfecting is) first introduced it to the public, and it is already recognized by the most eminent physicians in all parts of the country, to be the most surprising and effective remedy for certain diseases of which they have knowledge.

All other compounds or symps of the root have hitherts failed to command the sanction of the faculty, because, on boding tested, they have been found to contain notious in response to the command the sanction of the faculty, because, on

falled to command the anction of the faculty, because, on boing tested, they have been found to contain nonlocus ingredients, which mutralize the good efficies of the arraspartile, and oftentimes injure the health of the patient. It is not so with Harloy's preparation.

This is the pure and gonuine extract of the root; and will, so trial, be found to effect a certain and pariest cure of the fillowing complaints and diseases:

Affection of the Bone,
Beblitty,
Bireases of the Kilneys,
Byspesia

Pier complaint, dreases of the Khineys Typepsia Crappina Cemaio Irregularities, And all Diseases of the Skin.

Besides curing the above, it is also known to be a great and powerful tonic, purifying the blood and invigorating the

system. It is without exception, in the cases mentioned and its general effect on the system, the most efficacions, as it is most desirable, remedy of the age. It is already extensively used throughout the country, and is fast obtaining as Kuropera reputation. The instances of cures it has effected are daily coming to the proprietor's knowledge, and he has no hestination in recommending it to one and all who desire to ground relief from suffering. One boulde being tried, its effects will be too apparent to admit of further doubt. Horollest Hurley's Sarsaparilla is the only gonuine article in the market. n the market.
